

# Take Control of Your Enterprise Printing

How many pages do you print that are directly related to client matters? How much is this costing your firm each day? Try to add up the cost of paper, toner, ink cartridges, maintenance, wear and tear on the equipment and you begin to get the picture!

For law firms, real estate firms, architectural firms and any company that wants to bill clients for printing, Print Manager Plus Client Billing is your solution.

## Printing Can Cost Up to 15 Percent of Annual Revenues

Dataquest figures show that the average cost of producing documents is equivalent to 40% of a company's labor cost. Other industry analysts estimate printing to run between five and 15 percent of a company's annual revenues. Despite this huge expense and its impact on profits, most corporations just view it as "the cost of doing business" since it's impossible to control without the right information and tools. There is an easy solution to these "hidden" printing expenses. They can be easily managed!

## The Complete Print Management Solution

Print Manager Plus® allows you to quota and track all printing activity on a Windows® NT/2000/2003 network. It tracks pages being printed from Windows 2003/2000/NT 4.0, 3.51, Windows XP, Windows 98/Me, Windows 95, Windows 3.1, DOS, Macintosh, UNIX (all flavors) and OS/2 clients for a complete print management solution.

Now, you can take control of these valuable printing resources. No more wasted budget from "out of control" printing. You'll be amazed how much you can save by just tracking this outflow.

## Pays For Itself within 10 Days

It was written from the ground up as a native 32-bit application and service. Print Manager Plus installs in seconds on any Windows NT/2000/2003 print server and is so cost-effective it often pays for itself within 10 days. If you run on budgets and especially if you are responsible for printing, you need Print Manager Plus.

## What Customers Say

"For some of our printers (the expensive dye-sublimation ones, for instance), we charge for usage... [Print Manager Plus] helps us track usage and generate billing info. I am extremely satisfied with Software Shelf's products. They work as advertised and get the job done with little fuss."

"Print Manager Plus has been a great find... There's lots of interest — everyone of us is or will face the educational issues of responsible use of limited resources. Print Manager Plus is one very good technological helper to do so."

"In an open academic environment printing costs can quickly spiral out of control. With Print Manager Plus, we have been able to curb our over-zealous users with a simple, cross-platform solution."

"... [Print Manager Plus] has not only paid for itself several times over in terms of paper, toner, and maintenance costs, but has assisted us greatly in managing our printers... our university's paper consumption is half of what it used to be."

## Reviews

"The software worked well for me and seems to be relatively easy to configure and use. It's a perfect complement to Windows' built-in printer management features... In larger organizations, though, the software licenses will tend to pay for themselves because organizations using Print Manager Plus will save money each month as excessive printing is gradually reduced."

**TechRepublic**

"Businesses with runaway printing costs could certainly benefit from Print Manager Plus."

**Windows & .NET Magazine**

"Overall, I found Print Manager Plus very easy to install and manage... for schools, universities or facility houses which charge for a service [Print Manager Plus] could be a real boon. Recommendation is mandatory."

**PC-Pro Magazine**

## System Requirements
